

# welcome to **pure audio**

## More Music, Less Technology

Your enjoyment of music was the motivation for Gary Morrison and Ross Stevens to create PureAudio. Our every design decision is to serve this purpose. Purity in sound, materials, design, and execution is our goal. Our user interfaces are refined away to an unobtrusive minimum. Our materials and component choices will ensure a lifespan amounting to decades.

We invite you to enjoy our creations ...

# ONE integrated amplifier

*"Having had requests from our customers for an integrated amplifier I wanted to create a product that offered an all in one version of the best we have produced to date. The ONE integrated amplifier meets that goal. It is true to the very musical performance we have achieved with our separate products and is ready to take its place at the centre of the very best music systems."*

Gary Morrison

*"The ONE integrated amplifier has allowed us to combine all of the components into a single, substantial and simple to use product. The input buttons give direct and tactile selection of the preferred source components and this combined with the large volume control knob give simple and precise control allowing the listening experience to take center stage."*

Ross Stevens

"Pureaudio. Minimal, exotic, extraordinary." So said a recent reviewer of our products.

Our ONE Integrated amplifier follows in the footsteps of our other offerings and packages our separate Class A amplifier performance in one chassis along with a very minimal and transparent preamplifier section.

Offering 4 line level inputs, one direct input (bypassing the volume control) and with simple, direct push button source selection and full remote volume control, the ONE Integrated amplifier is set to become the heart of your music system.

Our ONE integrated amplifier sounds neutral or slightly tube-like and delivers a performance that is relaxed, pure and involving. Class A performance is maintained under typical domestic conditions and there is headroom to spare for demanding material. Difficult loads are easily driven.

As with our other products we have included a fully regulated, high-current power supply (you will rarely find this in competing products). This provides an optimum low impedance, low noise environment, from which the amplifier can deliver its very best.

While offering Class A operation we were conscious of the need to avoid energy wastage and so designed the amplifier to fall back automatically to a low power standby mode when not in use.

The amplifier's Class A operation is automated through both remote control and signal sensing.

Our universal chassis design, constructed from heavy aluminium, stainless steel mesh, and supported optimally on three custom designed feet, presents a beautiful architectural look and fully supports our musical goals.

#### Specifications:

Power: 100 Watts continuous into 8 Ohms  
Frequency Response: -3dB at 3Hz and 80kHz  
Input Impedance all inputs: 47k Ohms  
Distortion: Typically <0.01% under normal operation  
Current Output: 40A peak  
Hum & Noise: Inaudible  
Gain (maximum): 30dB  
Power Consumption In use: 450 Watts  
Dimensions: 410mm deep, 380mm wide, 155mm high  
Weight: 26kg

If you have any questions or comments either ask your PureAudio retailer, or contact us via our website,
